

# CONTROL THEORY AND TECHNOLOGY

## Vol. 16 2018 CONTENTS

### No. 1

Reconstruction of measurements in state estimation strategy against deception attacks for cyber physical systems	1	Q. Li, B. Xu, S. Li, Y. Liu, D. Cui
Secure design for cloud control system against distributed denial of service attack	14	Y. Ali, Y. Xia, L. Ma, A. Hammad
LQR and LQG based optimal switching techniques for PSS and UPFC in power systems	25	L. Yathisha, S. Patilkulkarni
Iterative computational approach to the solution of the Hamilton-Jacobi-Bellman-Isaacs equation in nonlinear optimal control	38	M. D. S. Aliyu
An equivalent linearization method for nonlinear Van der Pol oscillator subjected to random vibration using orthogonal functions	49	A. Younespour, H. Ghaffarzadeh, B. F. Azar
Output stabilization of distributed bilinear systems	58	E. Zerrick, L. Ezzaki
Regional gradient observability for semilinear hyperbolic systems: HUM approach	72	A. Khazari, A. Boutoulout, I. El Harraki

### No. 2

#### Special issue on unmanned aerial vehicles (UAVs)

Editorial	81	K. P. Valavanis
Flocking control of a fleet of unmanned aerial vehicles	82	A. Belkadi, Z. Liu, L. Ciarletta, Y. Zhang, D. Theilliol
Distributed output feedback stationary consensus of multi-vehicle systems in unknown environments	93	V. Rezaei, M. Stefanovic
Consensus controller for multi-UAV navigation	110	P. Kolaric, C. Chen, A. Dalal, F. L. Lewis
Ranging-aided relative navigation of multi-platforms	122	H. L. Pei, R. Xia
Nonlinear robust control of a quadrotor helicopter with finite time convergence	133	G. Zheng, B. Xian
Experimental evaluation of a real-time GPU-based pose estimation system for autonomous landing of rotary wings UAVs	145	A. Benini, M. J. Rutherford, K. P. Valavanis

\* \* \* \*

Call for papers	160
-----------------	-----

### No. 3

Multi-agent coverage control design with dynamic sensing regions	161	L. Ma, F. He, L. Wang, Y. Yao
Algorithmic approaches for optimizing electronic control unit time using multi-rate sampling	173	R. Raha, P. Dasgupta, S. Dey
A Stackelberg strategy for continuous-time mixed $H_2/H_\infty$ control problem with time delay	191	X. Li, W. Wang, J. Xu, H. Zhang
Limit behaviors of extended Kalman filter as a parameter estimator for a sinusoidal signal	203	L. Xie
Variational Bayesian data analysis on manifold	212	Y. Ming
Regional constrained control problem for a class of semilinear distributed systems	221	El H. Zerrik, N. El Boukhari
Queue reduction in discrete-event systems by relabeling	232	Y. Gan, T. Jiao, W. M. Wonham

\* \* \* \*

Research opportunities arising from measurement and estimation of quantum systems	241	W. Cui
Call for papers	244	

### No. 4

#### **A special issue to mark the 10<sup>th</sup> Anniversary of the Passing of Prof. Jingqing Han, a scholar ahead of his time**

Editorial	245	Z. Gao, Y. Huang
From flatness, GPI observers, GPI control and flat filters to observer-based ADRC	249	H. Sira-ramírez
Embedded model control: Reconciling modern control theory and error-based control design	261	E. Canuto, C. Novara, L. Colangelo
Development of nonlinear disturbance observer based control and nonlinear PID: A personal note	284	W.-H. Chen
Active disturbance rejection control: some recent experimental and industrial case studies	301	Q. Zheng, Z. Gao
Active disturbance rejection control: Applications in aerospace	314	S. E. Talole
Intelligence evolution for service robot: An ADRC perspective	324	G. Xiang, Y. Huang, J. Yu, M. Zhu, J. Su
Active disturbance rejection based load frequency control and voltage regulation in power systems	336	L. Dong, A. Mandal, A. Morinec, Y. Zhao
