

Control Theory and Technology

Volume 22 · Number 1 · February 2024

RESEARCH ARTICLES

Periodic event-triggered secure consensus for networked mechanical systems under Denial-of-Service attacks

S. Zheng · Z. Li · C. Zhai · P. Shi 1

Random gradient-free method for online distributed optimization with strongly pseudoconvex cost functions

X. Yan · C. Li · K. Lu · H. Xu 14

Event-triggered H_∞ consensus control for input-constrained multi-agent systems via reinforcement learning

J. Zhang · C.-E. Ren 25

Dynamical pattern recognition for univariate time series and its application to an axial compressor

J. Hu · W. Wu · Z. Zhu · C. Wang 39

Unknown system dynamics estimator-based impedance control for lower limb exoskeleton with enhanced performance

W. Zhang · P. Song · M. Wu · Q. Li · X. Mo · P. Ji 56

Observer design and interval estimation of time-delay discrete-time linear systems with external disturbance and measurement noise

J. Yang · J. Xie · F. Liu 69

Automatic modeling algorithm of stochastic error for inertial sensors

L.D. Zhao · L. Zhao 81

Output feedback adaptive super twisting sliding mode control for quadrotor UAVs

O. Salas-Peña · J. DeLeón-Morales ·

S.V. Gutiérrez-Martínez 92

Dual sliding mode coordinated control of manipulator grasping system with visual assistance

P. Zhang · H. Yu · X. Meng · Z. Li · Q. Yang · X. Gao 106

Global output feedback control of feedforward nonlinear time-delay systems with unknown growth rate and unknown measurement sensitivity

W. Yu · K. Gao · H. Zhou · Q. Liu 122

Variable projection algorithms with sparse constraint for separable nonlinear models

H.-L. Xu · G.-Y. Chen · S.-Q. Cheng · M. Gan ·

J. Chen 135

Volume 22 · Number 2 · May 2024

EDITORIAL

Special issue on system identification and estimation

W. Zheng · T. Chen · C. Yu · W. Zhao 147

RESEARCH ARTICLES

On convergence of covariance matrix of empirical Bayes hyper-parameter estimator

Y. Ju · B. Mu · T. Chen 149

Identification of FIR systems under difference-driven scheduled quantized observations

D. Liang · R. Jia · F. Jing · Y. Song · J. Guo 163

Full-parameter constrained parsimonious subspace identification with steady-state information for DC–DC converters

J. Hou · Z. Yang · T. Li · H. Wang · J. Jiang · X. Chen 173

The posterior selection method for hyperparameters in regularized least squares method

Y. Zhang · J. Chen · Y. Mao · Q. Zhu 184

Joint input–output identification of unstable systems with kernel regularization

Y. Fujimoto · T. Sugie 195

Identification of the Hammerstein nonlinear system with noisy output measurements

Q. Zha · F. Li · R. Liu 203

A stochastic gradient-based two-step sparse identification algorithm for multivariate ARX systems

Y. Fu · W. Zhao 213

Quantum state tomography from observable time traces in closed quantum systems

S. Xiao · Y. Wang · Q. Yu · J. Zhang · D. Dong ·

I.R. Petersen 222

On extended state Kalman filter-based identification algorithm for aerodynamic parameters

W. Bai · R. Jia · P. Yu · W. Xue 235

Secure state estimation for cyber-physical systems with unknown input sliding mode observer

P. Zhang · Y. Ren · Y. Fang · A. Liu 244

Enhanced adaptive nonlinear extended state observer for pure feedback systems with matched and mismatched disturbances

M. Delpasand · M. Farrokhi 254

Maximum correntropy-based pseudolinear Kalman filter for passive bearings-only target tracking

A. Urooj · R. Radhakrishnan 269

Application of system identification in a practical active noise control system

Y. Yuan · Z. Sun · H. Zhang 282

Online interactive identification method based on ESO disturbance estimation for motion model of double propeller propulsion unmanned surface vehicle

Y. Xiong · X. Wang · S. Zhou 292

Oxygen uptake response to switching stairs exercise by non-parametric modeling

H. Yu · C. Zhang · K. Cao · H.M. Alqudah · S. Weidong Su 315

Mathematical modelling of ball and plate system with experimental and correlation function-based model validation

T.R.D. Kumar · S.J. Mija 326

Volume 22 · Number 3 · August 2024

EDITORIAL

Special issue on analysis and control of complex systems in honor of the 90th birthday of Professor Huashu Qin

Y. Hong · S. Mei · P. Yang 343

REVIEW

An overview on the distributed internal model approach and its applications

Y. Su · H. Cai · J. Huang 345

RESEARCH ARTICLES

An adaptive large neighborhood search for the multi-point dynamic aggregation problem

S. Lu · B. Xin · J. Chen · M. Guo 360

Game-theoretic multi-agent motion planning in a mixed environment

X. Zhang · L. Xie 379

A hierarchical multi-UAV cooperative framework for infrastructure inspection and reconstruction

C. Gao · X. Wang · X. Chen · B.M. Chen 394

Distributed order estimation for continuous-time stochastic systems

X. Zhu · Z. Liu · X. Hu 406

Online distributed optimization with stochastic gradients: high probability bound of regrets

Y. Yang · K. Lu · L. Wang 419

Distributed algorithm for solving variational inequalities over time-varying unbalanced digraphs

Y. Zhang · Y. Tang · Z. Tu · Y. Hong 431

Safe formation control of multiple unmanned aerial vehicles: control design and safety-stability analysis

H. Li · J. Hu · Q. Zhou · B.K. Ghosh 442

Integral input-to-state stability of systems with small delays

R.H.H. Nawarathna · Y. Lin · Y. Wang 455

Global practical stabilization of the double integrator system with an imperfect sensor and subject to a bounded disturbance

Z. Zhu · Y. Li · Z. Lin 468

Model-free method for LQ mean-field social control problems with one-dimensional state space

Z. Xu · T. Shen 479

Online control for pressure regulation of oxygen mask based on neural network

L. Zhao · Q. Sun · H. Sun · J. Tao · Z. Chen 487

Volume 22 · Number 4 · November 2024

RESEARCH ARTICLES

On the optimality of uniform velocity–deceleration separation scheme for tethered satellite systems

P. Yu · J.-F. Zhang · S. Tan · J. Guo · Y. Zhao 503

Robust current control of single-phase PWM rectifier based on generalized internal model control

M.M. Ibrahim · L. Ma · Y. Zhao · S. Cheng 517

Reduction of data amount in data-driven design of linear quadratic regulators

S. Izumi · X. Xin 532

Kalman filtering for linear singular systems subject to round-robin protocol

A. Goel · S. Bhaumik · N.K. Tomar 543

PI-funnel and inverse hysteresis compensation cascade control of smart soft dielectric elastomer actuator

P. Huang · Y. Wang · Y. Zhang · J. Wu · C.-Y. Su 552

Pathological basal ganglia oscillations with time delays: a memoryless feedback control strategy

Y. Xia · X. Zhang · S. Xia · M. Wu · Y. Feng 568

Robust fault-tolerant control for quadrotor UAVs with parameter uncertainties and actuator faults

H. Liu · Y. Guo · Y. Zhang · B. Jiang 581

Precise trajectory tracking of mecanum-wheeled omnidirectional mobile robots via a novel fixed-time sliding mode control approach

Z. Sun · Z. Li · H. Xie · Y. Zheng · J. Zheng · B. Chen 596

Multi-modality hierarchical fusion network for lumbar spine segmentation with magnetic resonance images

H. Yan · G. Zhang · W. Cui · Z. Yu 612

Distributed robust matrix-scaled consensus control of perturbed multi-agent systems

B. Cheng · G. Li · K. An · C. Yu 623

Consistent batch fusion for decentralized multi-robot cooperative localization

N. Hao · F. He · Y. Yao · Y. Hou 638

ERRATUM

Erratum: Dual sliding mode coordinated control of manipulator grasping system with visual assistance

P. Zhang · H. Yu · X. Meng · Z. Li · Q. Yang · X. Gao 652
