## REVIEW

**Learning-based adaptive optimal output regulation of linear and nonlinear systems: an overview**

W. Gao · Z.-P. Jiang 1

## RESEARCH ARTICLES

**Adaptive output regulation for cyber-physical systems under time-delay attacks**

D. Jin · B. Chen · L. Yu · S. Liu 20

**Distributed robust MPC for nonholonomic robots with obstacle and collision avoidance**

L. Dai · Y. Hao · H. Xie · Z. Sun · Y. Xia 32

**Consensus control of feedforward nonlinear multi-agent systems: a time-varying gain method**

H. Li · X. Zhang · W. Pan 46

**Suppression of high order disturbances and tracking for nonchaotic systems: a time-delayed state feedback approach**

Z. Dastan · M. Tavakoli-Kakhki 54

**Constrained nonlinear MPC for accelerated tracking piece-wise references and its applications to thermal systems**

D. He · Q. Wang · P. Han · H. Du 69

**Adaptive robust simultaneous stabilization of multiple  $n$ -degree-of-freedom robot systems**

H. Zhang · R. Yang 80

**Safety stabilization of switched systems with unstable subsystems**

L. Long · Y. Hong 95

**Bearing fault diagnosis with cascaded space projection and a CNN**

Y. Zhao · M. Zhou · L. Wang · X. Xu · N. Zhang 103

**System identification with binary-valued observations under both denial-of-service attacks and data tampering attacks: defense scheme and its optimality**

J. Guo · X. Wang · Y. Zhang · W. Xue · Y. Zhao 114

**System identification with binary-valued observations under both denial-of-service attacks and data tampering attacks: the optimality of attack strategy**

J. Guo · X. Wang · Y. Zhang · W. Xue · Y. Zhao 127

## LETTER

**Sparse parameter identification of stochastic dynamical systems**

W. Zhao 139

## ERRATUM

**Erratum to: Adaptive robust simultaneous stabilization of multiple  $n$ -degree-of-freedom robot systems**

H. Zhang · R. Yang 142

Volume 20 · Number 2 · May 2022

## EDITORIAL

**Special issue on on-board optimization strategy design methods for connected hybrid electric vehicles**

T. Shen · C. Guardiola · F. Xu 143

## RESEARCH ARTICLES

**Real-time energy optimization of HEVs under-connected environment: a benchmark problem and receding horizon-based solution**

F. Xu · H. Tsunogawa · J. Kako · X. Hu · S.E. Li · T. Shen · L. Eriksson · C. Guardiola 145

**Real-time energy management strategy based on predictive cruise control for hybrid electric vehicles**

X. You · X. Jiao · Z. Wei · Y. Zhang 161

**On-board torque management approach to the E-COSM benchmark problem with a prediction-based engine assignment**

B. Zhang · J. Zhang · F. Xu 173

**Speed planning and energy management strategy of hybrid electric vehicles in a car-following scenario**

S. Hou · H. Chen · Y. Zhang · J. Gao 185

**Torque control strategy with V2X information for HEVs to minimize fuel consumption**

Y. Okada · S. Nishii · A. Takeshita · K. Harada · Y. Yamasaki 197

**Real-time energy-efficient anticipative driving control of connected and automated hybrid electric vehicles**

S. Dong · H. Chen · L. Guo · Q. Liu · B. Gao 210

**Optimization of fuel consumption and NO<sub>x</sub> emission for mild HEV via hierarchical model predictive control**  
Y. Umezawa · K. Yamauchi · H. Seto · T. Imamura · T. Namerikawa 221

**Fuel consumption reduction effect of pre-acceleration before gliding of a vehicle with free-wheeling**  
W. Cao · T. Kawabe · T. Yuno · X. Huang 235

**Stochastic model predictive braking control for heavy-duty commercial vehicles during uncertain brake pressure and road profile conditions**  
R. Nakahara · K. Sekiguchi · K. Nonaka · M. Takasugi · H. Hasebe · K. Matsubara 248

**Characterizing human driver characteristics using an artificial neural network and a theoretical model**  
S. Kim · T. Miyamoto · T. Kuboyama · Y. Moriyoshi 263

**A hybrid genetic algorithm for the electric vehicle routing problem with time windows**  
Q. Liu · P. Xu · Y. Wu · T. Shen 279

LETTER

**Recent advances on micro-control for near-critical complex systems**  
D. Zhao · Y. Dong 287

## Volume 20 · Number 3 · August 2022

RESEARCH ARTICLES

**A blockchain-based transaction system for private data sharing and trading**  
W. Cui · Y. Pan · Z. Ai 291

**Explicit solution to forward and backward stochastic differential equations with state delay and its application to optimal control**  
T. Ma · J. Xu · H. Zhang 303

**The Borel measure of sequences with bounded run-length**  
A. DeStefano · C. Martin 316

**Robust and fault-tolerant spacecraft attitude control based on an extended-observer design**  
A. Giuseppi · F. Delli Priscoli · A. Pietrabissa 323

**Stability analysis of the Euler-Bernoulli beam with multi-delay controller**  
A. Jalili Rahmtati · G. Xu · S. Effati 338

**Stabilization of an axially moving tape system with boundary disturbances via the ADRC approach**  
M.D. Aouragh · M. Nahli 349

**Stabilization of an uncertain multiple-oscillator system**  
H. Ye · C. Li · X. Qi · J. Liu 361

**Development of stability-preserving time-limited model reduction framework for 2-D and 1-D models with error bound**  
M. Imran · S.H. Ambreen · S.N. Hamdani · M. Imran · M.E. Naveed · M. Siddiqui 371

**Stabilizability of minimum-phase systems with colored multiplicative uncertainty**  
J. Li · J. Lu · W. Su 382

**An adaptive series control for an interior permanent magnet synchronous motor with actuator compensation**  
S.N. Lordejani · R.M. Milasi 392

**Human steering angle estimation in video based on key point detection and Kalman filter**  
Y. Hu · Y. Liu · Y. Xu · Y. Wang 408

**Robust state of charge and state of health estimation for batteries using a novel multi model approach**  
G. Guida · D. Faverato · M. Colabella · G. Buonomo 418

LETTER

**Decision-making and control co-design for multi-agent systems: a hierarchical design methodology**  
Y. Tang · H. Qin 439

## Volume 20 · Number 4 · December 2022

RESEARCH ARTICLES

**State of health based battery reconfiguration for improved energy efficiency**  
L.Y. Wang · G. Yin · Y. Ding · C. Zhang 443

**Design of semi-tensor product-based kernel function for SVM nonlinear classification**  
S. Xue · L. Zhang · Z. Zhu 456

**Non-iterative Cauchy kernel-based maximum correntropy cubature Kalman filter for non-Gaussian systems**  
A. Dak · R. Radhakrishnan 465

**Strong observability as a sufficient condition for non-singularity and lossless convexification in optimal control with mixed constraints**

S. Kunhippurayil · M.W. Harris 475

**Cooperative distributed state estimation: resilient topologies against smart spoofers**

M. Saf 488

**Bipartite consensus for nonlinear time-delay multiagent systems via time-varying gain control method**

H. Zhao · Y. Qi · Y. Chang · X. Zhang 504

**Discrete-time sliding mode control with power rate exponential reaching law of a pneumatic artificial muscle system**

Q.-T. Dao · T.-K. Le Tri · V.-A. Nguyen · M.-L. Nguyen 514

**A new path planning method for bevel-tip flexible needle insertion in 3D space with multiple targets and obstacles**

Z. Tan · D. Zhang · H. Liang · Q. Wang · W. Cai 525

**Mu-based trajectory tracking control for a quad-rotor UAV**

A. Hossam · A. El-Badawy 536

LETTER

**Retrospect and prospect on integration of gain and phase for feedback stability analysis**

D. Zhao · L. Qiu 555
