

CONTROL THEORY AND TECHNOLOGY

Vol. 12 2014 CONTENTS

No. 1

Control of a flexible rotor active magnetic bearing test rig: a characteristic model based all-coefficient adaptive control approach	1	L. Di, Z. Lin
Frequency-domain L_2 -stability conditions for time-varying linear and non-linear MIMO systems	13	Z. Huang, Y. V. Venkatesh, C. Xiang, T. H. Lee
Non-Zenoness of piecewise affine dynamical systems and affine complementarity systems with inputs	35	L. Q. Thuan
Distributed attitude synchronization using backstepping and sliding mode control	48	J. Thunberg, W. Song, Y. Hong, X. Hu
Capture condition for endo-atmospheric interceptors steered by ALCS and ARCS	56	Y. Liu, N. Qi, T. Wang
Design of high-speed and low-power finite-word-length PID controllers	68	A. K. Oudjida, N. Chaillet, A. Liacha, M. L. Berrandjia, M. Hamerlain
Constrained optimal steady-state control for isolated traffic intersections	84	J. Haddad, D. Mahalel, I. Ioslovich, P. Gutman

* * * *

Journal title change	67
Call for papers	95

No. 2

Engineering cybernetics: 60 years in the making	97	Z. Gao
Parameter estimation and reliable fault detection of electric motors	110	D. Progovac, L. Y. Wang, G. Yin
A novel trajectory-based online controller design approach to fault accommodation in NREL's 5MW wind turbine systems	122	T. Jain, J. J. Yamé, D. Sauter
Dynamic optimization for multi-agent systems with external disturbances	132	X. Wang, P. Yi, Y. Hong
Integral sliding mode based optimal composite nonlinear feedback control for a class of systems	139	Z. Zheng, W. Sun, H. Chen, J. T. W. Yeow
Global sampled-data output feedback control for a class of feedforward nonlinear systems	147	Z. Wang, J. Zhai, S. Fei
Analysis of synchronization in a supermarket refrigeration system	154	R. Wisniewski, J. Leth, J. G. Rasmussen
Capital injections with negative surplus and delays: models and analysis	163	Z. Jin, G. Yin
Solving type-2 fuzzy relation equations via semi-tensor product of matrices	173	Y. Yan, Z. Chen, Z. Liu
Robust graph coloring based on the matrix semi-tensor product with application to examination timetabling	187	M. Xu, Y. Wang, A. Wei
Semi-tensor product approach to networked evolutionary games	198	D. Cheng, H. Qi, F. He, T. Xu, H. Dong

* * * *

Journal title change	197
Call for papers	215

No. 3

Editorial: Special issue on recent advances in hybrid control theory and applications	217	C. Xiang
A learning-based synthesis approach to decentralized supervisory control of discrete event systems with unknown plants	218	J. Dai, H. Lin
A noninteracting control strategy for the robust output synchronization of linear heterogeneous networks	234	S. Khodaverdian, J. Adamy
On the ℓ_2 -stability of time-varying linear and nonlinear discrete-time MIMO systems	250	Y. V. Venkatesh
Design of two-layer switching rule for stabilization of switched linear systems with mismatched switching	275	D. Ma
Introducing robustness in model predictive control with multiple models and switching	284	S. Prabhu, K. George
Passivity-based consensus for linear multi-agent systems under switching topologies	304	Z. Feng, G. Hu
Progressive events in supervisory control and compositional verification	317	S. Ware, R. Malik

* * * *

Journal title change	274
Call for papers	330, 331

No. 4

Electrocardiogram (ECG) pattern modeling and recognition via deterministic learning	333	X. Dong, C. Wang, J. Hu, S. Ou
On linear observers and application to fault detection in synchronous generators	345	J. E. Stellet, T. Rogg
Robust sliding mode control of general time-varying delay stochastic systems with structural uncertainties	357	S. Wang, L. Bai, M. Chen
Adaptive-backstepping force/motion control for mobile-manipulator robot based on fuzzy CMAC neural networks	368	T.-L. Mai, Y. Wang
Robust state estimation for uncertain linear systems with deterministic input signals	383	H. Liu, T. Zhou
A novel trajectory planning strategy for aircraft emergency landing using Gauss pseudospectral method	393	S. Meng, J. Xiang, Z. Luo, Y. Ren, N. Zhuang
An online estimator for rotor resistance in vector drives of induction machines based on Walsh functions	402	H. Shirazi, J. Nazarzadeh

* * * *

Analysis and design of secure cyber-physical systems	413	L. Shi
Journal title change	382	
Volume contents	I
