

CONTROL THEORY AND TECHNOLOGY

Vol. 13 2015 CONTENTS

No. 1

Variable selection in identification of a high dimensional nonlinear non-parametric system	1	E.-W. Bai, W. Zhao, W. Zheng
Model predictive control for hybrid vehicle ecological driving using traffic signal and road slope information	17	K. Yu, J. Yang, D. Yamaguchi
Identification of integrating and critically damped systems with time delay	29	Bajarangbali, S. Majhi
Immersion and invariance adaptive control of a class of continuous stirred tank reactors	37	G. Hong, X. Liu, H. Su

Special issue on learning and control in cooperative multi-agent systems

Editorial	44	F. L. Lewis, Z.-P. Jiang, T. Liu
Pinning synchronization of networked multi-agent systems: spectral analysis	45	L. Xiang, F. Chen, G. Chen
Discrete-time dynamic graphical games: model-free reinforcement learning solution	55	M. I. Abouheaf, F. L. Lewis, M. S. Mahmoud, D. G. Mikulski
Topology-preserving flocking of nonlinear agents using optimistic planning	70	L. Buşoni, I.-C. Morărescu
Circle formation control for multi-agent systems with a leader	82	L. Zhao, D. Ma

No. 2

Special issue on modeling and control technologies for civil, energy, and power systems

Editorial	89	T. Shen, K. Z. Liu, S. Kanae
Distributed dynamic pricing based on demand-supply balance and voltage phase difference in power grid	90	Y. Okawa, T. Namerikawa
Decentralized load frequency control for two-area interconnected power system	101	W. Wang, H. Ohmori
Increasing the operating area of shunt active filters by advanced nonlinear control	115	A. Tilli, C. Conficoni
Simple adaptive air-fuel ratio control of a port injection SI engine with a cylinder pressure sensor	141	C. Khajorntraidet, K. Ito
Estimation and feedback control of air-fuel ratio for gasoline engines	151	M. Kumar, T. Shen
Gain-scheduling control of a floating offshore wind turbine above rated wind speed	160	O. Bagherieh, R. Nagamune
New adaptive vector control methods for induction motors with simpler structure and better performance	173	K. Z. Liu, M. Yokoo, K. Kondo, T. Zanma
Analysis and modeling of hysteresis of piezoelectric micro-actuator used in high precision dual-stage servo system	184	M. A. Rahman, A. Al Mamun, K. Yao
Ethernet based time synchronization for Raspberry Pi network improving network model verification for distributed active turbulent flow control	204	M. Dueck, M. Schloesser, S. van Waasen, M. Schiek

No. 3

Optimal control of quantum systems with $SU(1, 1)$ dynamical symmetry	211	W. Dong, R. Wu, J. Wu, C. Li, T.-J. Tarn
\mathcal{L}_1 adaptive control with sliding-mode based adaptive law	221	J. Luo, C. Cao
Infinite horizon indefinite stochastic linear quadratic control for discrete-time systems	230	W. Zhang, Y. Li, X. Liu
Error quantification of the normalised right graph symbol for an errors-in-variables system	238	L. Geng, S. Cui, Z. Xia
Output constrained IMC controllers in control systems of electromechanical actuators	245	P. M. Marusak, S. Kuntanapreeda
Quasi-Newton-type optimized iterative learning control for discrete linear time invariant systems	256	Y. Geng, X. Ruan
On the use of positive feedback for improved torque control	266	H. Dallali, G. A. Medrano-Cerda, M. Focchi, T. Boaventura, M. Frigerio, C. Semini, J. Buchli, D. G. Caldwell

* * * *

Call for papers	286
-----------------	-----

No. 4

A survey on cross-discipline of control and game	287	D. Cheng, T. Liu
Nonlinear optimized adaptive trajectory control of helicopter	297	A. Abaspour, S. H. Sadati, M. Sadeghi
Switched visual servo control of nonholonomic mobile robots with field-of-view constraints based on homography	311	B. Jia, S. Liu
Topological structure and optimal control of singular mix-valued logical networks	321	Y. Wang, J. Feng, M. Meng
Stochastic sub-gradient algorithm for distributed optimization with random sleep scheme	333	P. Yi, Y. Hong
Linear quadratic regulation for discrete-time systems with state delays and multiplicative noise	348	L. Li, H. Zhang
